

REMARKS

The above additional claims add no new matter. The changes to the specification provide for clarification as the the fact that if a phone is disabled for a period of time and then automatically turns back on, it cannot be totally shut down. This partial shut down has been amended to be called an "override" thereby eliminating the confusion that would be cause by referring to two different functions as "shut down".

In view of the foregoing, it is respectfully submitted that the case is in condition for prosecution.

Respectfully submitted

Sheldon H. Parker
